

SIHL INTRODUCES New Pacifica™ Matte Paper

PRODUCT ANNOUNCEMENT

Dear Sihl Customer

Sihl Digital Imaging has developed a new matte paper to meet the growing demand for solvent print production. **3157 Pacifica™** is a bright white, super smooth, high performance matte photo paper. Pacifica™ features a proprietary barrier coating that seals the base paper, prevents show through and cockle and maximizes print density color gamut and shadow detail at the surface.

PRINT

Sihl Pacifica™ combines maximum ink loading and extremely fast drytimes to produce excellent print quality and color gamut. Pacifica™ is compatible with all solvent, eco solvent, latex and UV printers.

* Visit www.sihlusa.com for print settings on the leading brands of inkjet printers.

FINISH

The unique Sihl Pacifica™ coating is sufficiently water and scratch-resistant. For added durability or a change of surface finish, Pacifica™ can be laminated with either pressure sensitive or heat activated films.

BUY

Sihl 3157 Pacifica™ Matte Paper

Roll Sizes: 36", 54", 60" by 150' length, 3" core.

Sincerely,

Sihl Digital Imaging Team
