

SIHL INTRODUCES NEW 3275 TexBanner Xtrem white 145

PRODUCT ANNOUNCEMENT

Dear Customer -

Finally an economic alternative to Tyvek®! Sihl presents its newest banner - 3275 TexBanner Xtrem white 145!

TexBanner 3275 is a 100% synthetic non-woven material coated with our water-fast matte inkjet formulation. It's high tensile strength and tear resistance, combined with its ability to be stapled, sewn, or used with grommets makes it the perfect indoor or outdoor banner! Although 3275 is optimized for aqueous based inks, it delivers optimal performance with latex and UV inks as well.

The cost to performance ratio of this media combined with its many application possibilities makes it stand out amongst the rest! We encourage you to give 3275 TexBanner a try - we guarantee you won't be disappointed.

3275 TexBanner Xtrem white is available in the following sizes:

36"/42"/54"x125' - 3" core

All the best,

Sihl Inc.
