| |
|--|
| Photo = Aqueous Paper or Solvent Paper |
| POS - Film |
| Banner - Banner |
| Backlit - Film |
| Matte - Solvent Paper |
| Canvas - Banner |

Generic Rip Settings:

| |
|----------------------------|
| Set Printer Drying to 131° |
| Set Printer Curing to 200° |
| Set Heat Airflow to 30% |

For thinner material, or material that is experience excessive warping and head crashes

- Increase vacuum to as high as 80%
- Keep existing heat settings
- Use the media edge guides if available (new L26500 or L28500)
- After a successful test print, slowly increase the heat and the total ink in the profile to obtain a larger color gamut and ink adhesion.

How to Buy

For additional Sihl Digital Imaging product information, please call 1-800-366-7393 or visit our website www.sihlinc.com where you can also find an authorized Sihl reseller near you.
