

SIHL INTRODUCES NEW 3248 & 3241 DisplayPRO 8 & 11mil

PRODUCT ANNOUNCEMENT

Dear Sihl customer, (fan, friend, partner)

Let us introduce you to your next favorite print media for the Latex print platform.

The DisplayPRO 8 and 11 mil! Extremely versatile, exceptionally durable & amazingly scratch resistant!

Not to mention recyclable as DisplayPRO 8 and 11 mil products are constructed of high grade PET which places them at the top of the recyclable scale at 'class one' recyclability.

Exceptional curl resistant and lay flat design allows for such versatile application as roll up banner stands, free hanging posters or directional, indoor or outdoor graphics and imaging. Utilizing Sihl's encapsulation coating technology either or both sides may be printed with equally stunning results.

To ensure the impact of the graphics a smooth low glare surface has been designed which also adds to the amazing level of scratch resistance and the overall perfection of Display Pro 8 and 11mil PET. The ease of handling, durability and versatility of application puts Display PRO in a class of its own.

Sincerely,
Sihl USA

Sizes: 36" & 54" by 100'
