

SIHL INTRODUCES NEW IRRADIA™ MATTE CANVAS

PRODUCT ANNOUNCEMENT

Dear Sihl Customer,

SiHL Digital Imaging has developed an everyday matte inkjet canvas that will exceed your expectations from the Print... to Finish... to Stretch.

SiHL 3184 Irradia™ Canvas is a 17 mil matte canvas with a 1:1 structure and a bright white, super absorbent, instant dry coating for use with aqueous inkjet printers. For everyday canvas printing of photos, art reproduction, portraits and more, **Irradia™** canvas offers excellent quality print performance mixed with soft hand and even texture. We start with a polyester / cotton blend that creates a consistent texture and stable base with a natural feel from the first print on the roll to the last.

PRINT

Irradia™ combines maximum ink loading and extremely fast dry-times to produce excellent print quality and color gamut designed for framed art or photo reproduction. A bright white, textured matte finish gives excellent contrast and depth with “plug and play” performance across the most common aqueous printer platforms.

Visit www.sihlusa.com for the onboard print settings for Epson, Canon, HP and other leading brands of inkjet printers.

FINISH

Irradia™ is designed to work with both solvent and aqueous liquid laminates. Whether the final job calls for gloss, satin, or matte overcoat, **Irradia™** is a great starting point. And, if the print needs no protective overcoat, the textured matte finish is water resistant, keeping the inks colorfast across a wide range of exposure conditions.

STRETCH

Irradia™ combines a new polyester / cotton base, premium gesso, and our new flexible inkjet receptive coating into a print canvas that can be professionally stretched, folded, and gallery wrapped.

BUY

3184 Irradia™ Matte Canvas is in stock and available for immediate shipment.

Roll Sizes: 17", 24", 36", 44", 50" by 40' length, 2" core.

Call 1-800-366-7393

Sincerely,

SiHL Digital Imaging Team
