

SIHL INTRODUCES New Illumina™ Semi-Gloss Canvas

PRODUCT ANNOUNCEMENT

Dear SiHL Customer,

SiHL Digital Imaging has developed a premium inkjet canvas for use with aqueous inkjet printers for the most demanding photographers, artists and print shops. SiHL Illumina™ Semi-Gloss Canvas – 3185 is a 19 mil semi-gloss canvas with a 2:1 structure and a microporous, instant dry coating.

Illumina™ is the first in a new line of US coated canvas products made in our Rhode Island factory. This new line will allow SiHL to offer more competitive pricing and maintain higher inventory levels to respond to large orders. Compare 3185 - Illumina™ to 3948 - Instant Dry canvas to see improved performance and significant savings.

PRINT

Illumina™ Semi-Gloss Canvas combines maximum ink loading and extremely fast dry-times for unparalleled density and color gamut. The bright white finish and semi gloss coating give excellent contrast and depth. Visit www.sihlusa.com for onboard print settings for Epson, Canon and HP printers.

FINISH

Illumina™ Semi-Gloss Canvas is designed to work with solvent or aqueous liquid laminates. Whether the final job calls for gloss, satin, or matte overcoat, Illumina's semi-gloss inkjet receptive layer will produce richer blacks and more vivid hues than if printed on a matte canvas. And, even with no protective overcoat, Illumina's high gloss finish is water resistant, keeping the inks colorfast across a wide range of exposure conditions.

STRETCH

Illumina™ Semi-Gloss Canvas marries the best qualities of poly/cotton base, premium gesso, and our proprietary flexible inkjet receptive coating into a print canvas that can be professionally stretched, folded, and gallery wrapped without fear of edge cracks or sagging.

BUY

3185 Illumina™ Semi-Gloss Canvas is in stock and available for immediate shipment.
Roll Sizes: 24", 36", 50" by 40' length, 2" core.
